

## Product Data Sheet

**STORAGE TRAY, 1RU 300mm deep**

FRONT/MID/REAR

MOUNT 19 or 21" RACK

**PART NO: 125/173**

**Telstra S/I: 40010714**

## Application

This 1RU slide out fibre storage tray allows excess optical fibre cord/s to be stored into coils or loops. The half slide out storage tray is either 19 or 21 inch rack mountable. Using 4 x M6 mounting screws and cage nuts supplied. The tray has a Perspex cover to protect the optical cord stored within. It is recommended individual coils of optical fibre cord be secured by several hook and loop style ties. The 1RU can store up to 10M of 5mm diameter cord. It has tie off points within the tray and come with the Velcro ties to allow fast and variable tie off points. In addition, fixed plastic clips are provided to allow the fibre to be easily placed in position.

## Features

- Openable type design, with 90mm of travel. Travel is limited due to the cord management.
- compact storage of optical fibre cords up to 10m of 5mm diameter cord
- Features openable style guiding clips on the tray Vented allowing for air to flow cooling of active equipment
